

J/ψ and Drell-Yan

J/ψ cross section at $\sqrt{s} = 200 \text{ GeV}$, $B\sigma = 0.078 \mu\text{b}$

p_T distribution from E789 and rapidity distribution
supplied by Vogt

Drell-Yan cross section for $M > 3 \text{ GeV}$ is $\sim 0.003 \mu\text{b}$

+ thus negligible
